

**Item Name :** Half Head Life Size

**Item Code :** 4051.2008.01

**Item Description :**

Life size model shows the right half of the human head and neck, sectioned along the sagittal plane. A superficial dissection exposes the facial muscles, the superficial blood vessels and nerve branches of the face and scalp, the parotid and submandibular glands. A median dissection exposes the brain with its internal structure, the pharynx and upper respiratory tract, a section of the cervical vertebrae.
