

Item Name : Pathological Model Of The Rectum

Item Code : 4110.2008.01

Item Description :

This 1-piece model, approximately 5X life size, shows various pathologies of the rectum and anus. Common anorectal conditions, including hemorrhoids, anal fistulae and fissures and 2 types of abscesses are shown in great detail. The model also illustrates ulcerative colitis, polyps and rectal carcinoma.
