Glassware

A watch glass is used for evaporation, covering beakers, and holding small quantities of solids. Glacier India's watch glasses are manufactured from high-quality borosilicate glass for durability, chemical resistance, and clarity. The 15 cm diameter profile suits chemistry, biology, and industrial labs. Smooth polished edges ensure safety, while OEM-grade quality makes it trusted by institutions worldwide.

What is a Watch Glass Used For?

44, Vikas puri, P.O.Ind.Estate, Jagadhri Road,
A/Cantt-133 006. Haryana, India.
