

Item Name : Analog Ammeter with pointer

Item Code : 3003.2008.01

Item Description :

The ammeters measure in amps the current flowing through an electrical circuit.

Technical Specification:-

- Accuracy: class 1.5. • Ferromagnetic devices.
- Scale length: 80mm over 90°. • Mounting in enclosure or cubicle.
- Maximum operating position: 30°/vertical. • Temperature: Operation -25°C to 50°C.
- Influence of temperature on accuracy: $\pm 0.003\%/^{\circ}\text{C}$.
- Utilization frequency: 50/60HZ. • Permanent overload: 1.2In.
- Maximum overload for 5s: 10In
