

Item Name : Analog Voltmeter With Pointer

Item Code : 3005.2008.01

Item Description :

The voltmeter measures in volts the potential difference of an electrical circuit.

Tech Specification:-

- Accuracy: class 1.5. • Ferromagnetic devices.
- Scale length: 80mm over 90°. • Mounting in enclosure or cubicle.
- Maximum operating position: 30°/vertical. • Temperature: Operation -25°C to 50°C.
- Influence of temperature on accuracy: +-0.003%/°C.
- Utilization frequency: 50/60HZ. • Consumption: 3VA.
- Permanent overload: 1.2Un. • Maximum overload for 5s:2Un.
